Action plans & preventing hospitalizations

All patients diagnosed with asthma should have a written action plan. Using the action plan, the family knows how to monitor their child's asthma and knows what to do if their asthma flares. When their asthma is not controlled, based on their individual plan, they may need to increase their maintenance medications, or may need to contact their provider.

- The **“Back”** button – will take you to the previous page you viewed
- The **“End & Start Here Later”** button – this will save the page you are viewing. The next time you login to that toolkit, it will automatically take you to the page you saved for 30 days unless you save a different page in the toolkit or delete your cookies. Warning: deleting your cookies will delete all your saved pages, including pages you’ve saved in other toolkits.
- The **“Print in PDF”** button – this allows you to download a PDF file of the toolkit and print the toolkit.
- The **“Exit to Home Page”** button – returns you to the home page of www.azpedialearning.com
- The **“Next”** button – Takes you to the next page.
- At the bottom of the webpage is a drop down menu to take you to any page in the toolkit.
